Professional Summary

MERN Stack Developer with applied experience in **AI/ML** projects and hands-on expertise in full-stack web development. Built 10+ production-ready applications using React, Node.js, and MongoDB, focusing on scalable architecture, performance optimization, and real-world problem solving. Experienced in implementing machine learning models using Python and PyTorch. Passionate about building efficient web applications and exploring intelligent systems in practical environments.

Technical Skills

Frontend: React.js, Next.js, Tailwind CSS, JavaScript (ES6+), HTML5, CSS3

Backend: Node.js, Express.js, Prisma ORM, RESTful APIs, JWT Authentication

Programming Languages: Python, JavaScript, C, C++, Java

Databases: MongoDB, MySQL, PostgreSQL, Firebase

AI/ML: Machine Learning, Deep Learning, PyTorch, NLP, Computer Vision, CNN, RNN, Transformers, Data Preprocessing, Model Training

Automation & Scripting: Web Automation, Selenium, API Automation, Python Scripting, Task Automation

Tools & Platforms: Git, GitHub, Docker, Postman, API Testing, Deployment Basics

AI/ML Experience

- **Applied AI Training Program** — Completed an intensive, project-focused AI/ML program with hands-on exposure to real-world datasets, model development, and deployment pipelines.
- **Technical Proficiency:** Implemented supervised/unsupervised learning algorithms, neural architectures (CNN, RNN, Transformers), and model optimization techniques using PyTorch.
- **Project Track:** Delivered some end-to-end AI solutions including emotion detection and healthcare prediction systems with 80%+ accuracy.

Projects

Medical Camp Management System

Built a full-stack platform for managing medical camps with authentication and payment system.

[GitHub](#) — [Live](#)

MERN

Car Rental System

Developed a real-time booking system with dynamic pricing and user dashboard.

[GitHub](#) — [Live](#)

React + Node.js

Coaching Management System

Built a role-based coaching platform for managing students, teachers, courses, and payments.

[GitHub](#) — [Live](#)

MERN

Medical Insurance Cost Predictor

Built a ML web app using Random Forest to predict insurance cost with feature engineering.

[GitHub](#) — [Live](#)

ML + Python

HSC GPA Calculator

Developed a ML model to predict student GPA based on academic and social factors.

[GitHub](#) — [Live](#)

ML + Python

Education

- **Southeast University, Bangladesh**
BSc in Computer Science & Engineering 4th Year Ongoing
- **Notre Dame College, Dhaka**
Higher Secondary Certificate (HSC), Science GPA: 5.00/5.00
- **Govt. Islampur Nekjahan Pilot High School**
Secondary School Certificate (SSC), Science GPA: 5.00/5.00

Additional

- **Activities:** Competitive Debater (3+ years), Open Source Contributor, Technical Content Writer
- **Languages:** Bengali (Native), English (Professional Working Proficiency)
- **Interests:** Artificial Intelligence (AI), Machine Learning (ML), System Design, Software Development
- **Soft Skills:** Communication, Problem-Solving, Leadership, Team Collaboration, Decision Making
- **Work Approach:** Task Prioritization, Working Under Pressure, Goal-Oriented Execution
